## Butterflies of Europe and neighbouring regions

This guide presents exclusively Butterflies of Europe and neighbouring regions (including North Africa).

More than 800 species are illustrated and given an exact description. Special focus is given to the often abundant variation, 6000 photos.

**90,00 €** (norm 98 €)

## Moths of Europe, volume 4: Pyralids 2

This guide book covers exclusively pyralids in the Pyralidae family which span the subfamilies:

Pyralinae, Epipaschiinae, Galleriinae and Phycitinae.

ISBN : 978-2-913688-22-3

**75,00 €** (norm 83 €)

## Moths of Europe, volume 3: Pyralids 1

This guide book covers the zygaenids (Zygaenidae), Brachodidae and pyralids (Crambidae).

The 10 subfamilies representing the pyralids in Europe and studied in this guide are the:

Pyraustinae, Spilomelinae, Odontiinae, Evergestinae, Glaphyriinae, Crambinae, Schoenobiinae, Cybalomiinae, Scopariinae and Acentropinae.

ISBN : 978-2-913688-14-8

**78,00 €** (norm 86 €)

## Moths of Europe, Volume 2: Geometrid Moths

This guide book deals with more than 1000 species of Lepidoptera traditionally grouped together as geometers and classified in the Geometridae family (plus a single species from the Uraniidae)

Illustrations are displayed in the form of 158 colour plates showing 1116 species in 2800 photos.

ISBN : 978-2-913688-09-4

**75,00 €** (norm 83 €)

## Moths of Europe, volume 1

This guide covers around 500 moths (Lepidoptera, Heterocera) traditionally gathered under general names of Saturnids, Lasiocampids, Hawkmoths, Tiger moths, Swifts and so on.

Arctiidae, Sphingidae, Lasiocampidae, Saturniidae, Endromidae, Lemoniidae, Bombycidae, Drepanidae, Axiidae, Limacodidae, Notodontidae, Lymantriidae, Brahmaeidae, Castniidae, Heterogynidae, Somabrachyidae, Cossidae, Hepialidae and Thyrididae.

ISBN : 978-2-913688-07-1

**52,00 €** (norm 60 €)
